

Happy HeiferTM
Cow Bedding

GET HAPPY HEIFER FOR A HEALTHY HERD!

Organic and Sustainable

Happy Heifer is selectively and stringently engineered from 100% virgin fines from clean, sustainably harvested orchard wood. Happy Heifer bedding is soft, long lasting and exhibits excellent ventilation and drainage properties to inhibit pathogen growth.

When recycling the used bedding, Happy Heifer is an excellent high organic carbon, low-nitrogen, low-ash, ultra-low to zero sodium compost input product.

For organic compost operations where input products must be tracked to the source, Happy Heifer is tracked to the source/field of origin. It is a highly cost-efficient and labor-efficient, cradle-to-cradle bedding product.

Happy Heifer bedding is a soft, comfortable alternative to abrasive almond shells.

Happy Heifer is sustainably produced in Central California using state-of-the-art, low-emission, P.E.R.P.- and D.O.O.R.S.-registered equipment.

Animal and Farmer Friendly

Happy Heifer™ brand organic cow bedding is a best management practice for dairies, providing maximum cow comfort plus cost- and labor-efficiency for the farmer. Happy Heifer is soft, naturally absorbent and non-abrasive, so dairy cows stay dry and comfortable.

Soft and Safe

Happy Heifer bedding is ideal for use in all traffic areas and stalls, with uniform support for resting cattle. It offers sure footing for the herd, and minimizes risk of injury to udders, hoof cuts or infections often seen with hard and abrasive almond shells.

Tested and Certified

Happy Heifer is carefully tested and certified to meet tough EPA and USCC STA standards for acceptable sizing, pH levels, and absence of metals, fecal coliform and other contaminants.

MulchMaster is a manufacturer, supplier, and Licensed Contractor servicing the agricultural, landscape and erosion control industries.

Our commitment to customer service drives everything we do.
